

# Welding data monitoring in the pipeline construction

- complete monitoring of all welding parameters
- robust and outdoor capable construction of all components
- full documentation of welding current, voltage, speed, energy per section, position and temperature
  - processing of layer and pipe numbers
  - seam and layer protocols
  - certification of the temperature trends

## HKS - systems:

- automatic inline-monitoring while welding
- prompt reaction in case of faults
- traceable and part oriented documentation over many years
